RE: Sauget Sites, Area 2
IL630200005 - St. Clair County

Dear Mr. Child:

Browning-Ferris Industries of St. Louis, Inc. ("BFI") received a letter from William C. Child, Manager, Division of Land Pollution Control, Illinois Environmental Protection Agency on December 20, 1989, requesting information regarding the above-referenced site pursuant to Section 104(e) of CERCLA 42 U.S.C. 9604, Section 3007 of RCRA, 42 U.S.C. 6927 and Section 4 of the Environmental Protection Act, Illinois Revised Statute, Chapter 111 1/2, Paragraph 1004. This response to the request for information is submitted on behalf of BFI.

1. Copies of all shipping documents or other business documents relating to the transportation, storage and/or disposal of waste materials or substances at the above-referenced Area.

After a diligent search of all available documents, Respondent has been unable to locate shipping documents or other business documents relating to the transportation, storage and/or disposal of waste materials at the Sauget Landfill.

Based upon employee interviews, Respondent has determined that it transported waste to the Sauget Landfill Area 2. Most of the waste transported was generated by commercial and residential customers. The industrial waste which was transported to the site was done on an irregular basis during the mid to late 1960's and early 1970's. Due to the passage of time, the employees' recollection of specificities in regard to transportation, volume and chemical composition of the industrial waste material are unclear. Some of the facts that could be recalled by these employees are indicated below. Any contact with these individuals should be arranged through me.

① Jerry Lovelace, an employee of Respondent, recalls transporting waste from Monsanto's Idaho Street facility in 10-yard containers to Area 2. The waste was a white, gritty-like substance and was water based. This employee was unable to recall the industrial process for which this material was a waste by-product. In addition, he recalled transporting quick lime in a white powder form from Monsanto's facility to the Sauget Landfill Area 2.

② Bernard Grewe, an employee of Respondent, recalls transporting barrels of liquid and sludge material to Sauget Landfill Area 2. He could recall transporting paint sludge and pigments for U.S. Paint, an unknown liquid for Dennis Chemical, rubber-type glues for Immort Corp. and Crown Cork and Seal, and barrels of an unknown material for Barry Weirmiller Steel Fabrication. Due to the passage of time, Mr. Grewe was unable to recall with specificity the volume of these waste materials, but thinks that he may have been transported to the Sauget Landfill Area 2 on an almost daily basis.

③ Kenneth Smith, an employee of Respondent, recalls transporting approximately three loads of waste material to Sauget Landfill Area 2 from Cooper, now known as Ethyl Petroleum. The material was of a honey-like consistency and it had granules in it.

④ Ralph Hatchet, an employee of Respondent, recalls transporting waste for J. Weaver which contained metal shavings. In addition, he transported commercial waste from Venture Department Stores and empty oil cans from Container Corp. to Sauget Landfill.

⑤ James Wieberg, an employee of Respondent, recalls transporting residential and commercial waste to the Sauget Landfill Area 2 for the city of Crestwood, Missouri.

2. A detailed description of the generic, common and/or trade names and the chemical composition and character (i.e., liquid, solid, sludge) of the material offered by you for transportation to, storage and/or disposal at the above referenced Area.

Other than the information which has been provided in Respondent's Answer to Question 1, information in regard to the generic, common and/or trade names of the waste material and the chemical composition of such material is unknown.

3. For each waste material or substance identified above please give the total volume (gallons for liquids and sludges and cubic yards for solids) which you transported to, stored or disposed of at the above-referenced Area, and list when transportation storage or disposal occurred. Also, describe as accurately as possible the precise location where said activities took place.

Other than the information which has been provided in Respondent's Answer to Question 1, information in regard to the total volume of each waste stream or the date of transportation is unknown.

Each employee was shown the map of the Sauget Landfill Areas 1 and 2 and which was provided to Respondent in Illinois EPA's Request for Information. Each employee said that the map was unclear and that it was not possible to indicate precisely where site activities took place.

4. A description of arrangements that were made for transportation of your waste materials or substances to the above-referenced Area, including method(s) of transportation used (i.e., tankers, dump trucks, drums).

Not applicable.

5. The names of the transporter(s) of your waste materials or substances, including the former and current address of the transporter(s).

Not applicable.

6. Copies of all records, including analytical results and material safety data sheets, which indicate the chemical composition and/or chemical character of waste material(s) transported to, stored or disposed of at the above-referenced Area.

After a diligent search of all available documents, Respondent has been unable to locate analytical results or material safety data sheets which would indicate the chemical composition or character of the waste material transported to Sauget Landfill Area 2.

7. A list and description of any and all liability insurance that is and was carried by you, including but not limited to any self-insurance provisions, which relate to waste materials or substances and the above-referenced Area. Include copies of all such insurance policies.

See attached as Exhibit A a list of insurance carriers that may have issued insurance policies and which may provide coverage to Respondent.

8. Evidence of transactions and/or agreements made between yourself and owners of property within the above-referenced Area during the period of disposal.

After a diligent search of all available documents, Respondent has been unable to locate any documents indicating any transactions or agreements made between Respondent and the owners of the property on which the Sauget Landfill is located.

The information provided herein is as complete and accurate as possible at this time. BFI will voluntarily submit to Illinois EPA any additional information which comes to its attention that supplements or modifies any of its responses to this Request for Information.

Please direct all future correspondence and questions concerning this information response and the Sauget Sites, Area 2, to the undersigned at Browning-Ferris Services, Inc., P.O. Box 3151, Houston, Texas 77253, 713/870-7680.

Sincerely,

A handwritten signature in cursive script, reading "E. William Hutton".
